PLENR

Our Skills

We are providing services based on data analysis and IT tools development.

PlenR brings support for decisions from **site identification** to **dismantling of turbines** through **wind assessments**, **technical assessments** and **challenging technical operations**.

Innovation is part of our DNA and PlenR is developing tools for **assessments**, **analysis** and **predictive maintenance**.

Our team is part of a **strong network of experts** into renewable energy industry.

Together we are supporting you in development of **smart energy**.
